Student Attendance Management

Reducing teachers' workload with increased efficiency

Common Challenges

Teachers and security personnel encounter various challenges, such as:

Difficulty in accurately recording students' attendance

Inefficient processes during peak student hours

Inability to obtain real-time attendance data

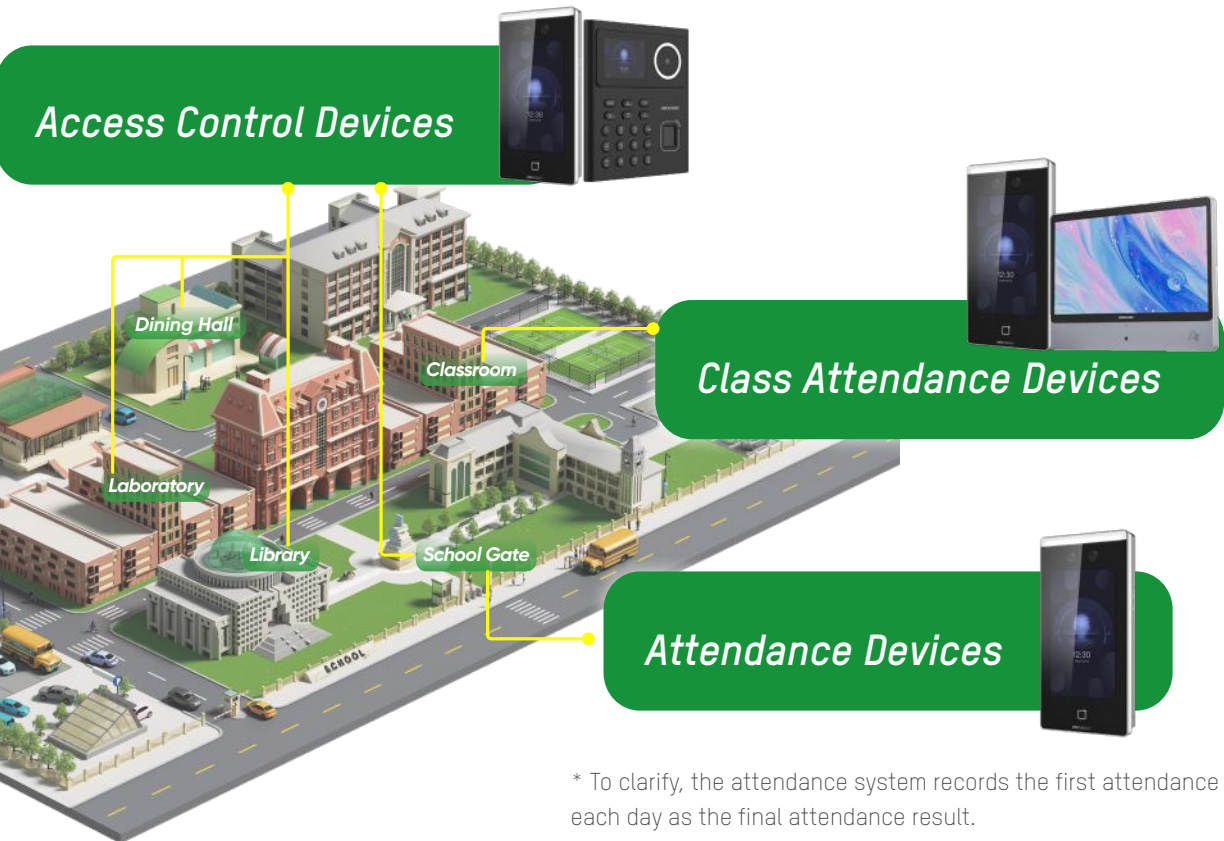

To address these issues, **Hikvision's student management solution** can help.

What We Offer

Hikvision's integrated solution allows for efficient attendance and access control throughout the campus using a range of advanced IoT devices. This provides students with a flexible and convenient experience, while teachers can easily view real-time records and reports via an intuitive platform.

An interconnected comprehensive solution

All attendance records, from entry points to teaching buildings, classrooms, and dormitories, are consolidated and centrally managed in a single platform.

* To clarify, the attendance system records the first attendance data of each day as the final attendance result.

Daily attendance

- Offers flexible attendance using Hikvision's diverse IoT devices
- Integrates attendance data across various areas in HikCentral Professional Platform
- Automatically generates attendance reports based on entry and exit records

Classroom attendance

- Students check in before each lesson using either the Face Recognition Terminal or Education Digital Signage
- Simultaneous recognition of multiple students increases efficiency
- Teachers can conveniently manage class timetables, student lists, and access attendance reports on the HikCentral Professional Platform

Access control

- Advanced deep learning algorithms enable touch-free, efficient access and attendance at the school gate, libraries, and laboratories
- Records can be easily verified using nearby high-definition cameras, providing comprehensive security management
